Hot Pushbutton Control with Child Safety Feature – Slide red button away from you and depress control to dispense. Release to stop.

Cool Pushbutton Control – Depress control to dispense. Release to stop.

Cold Pushbutton Control – Depress control to dispense. Release to stop.

Function Lights – Green light above ON icon indicates the dispenser is plugged in. When this light is flashing it indicates the self-cleaning cycle is open.

Green light above snowflake indicates the dispenser is cooling water. Green light above wavy lines indicates the dispenser is heating water. Blinking red light above the bottle icon indicates the bottle is empty.

Bottle Support – Helps align sports bottles and glasses with spout to eliminate spills.

Spout – Hot, cool and cold water comes out here.

LED Nightlight – Located behind bottle support. Helps in low light situations.

Probe Assembly – Located inside cabinet. Connects to bottle to allow water to be pumped into hot and cold tanks.

Probe Hanger – Located inside door at top. Rest probe assembly here to keep clean when not changing bottles.

Drip Tray & Grid with Full Indicator – Dishwasher safe. Slides in and out. Red full indicator in tray rises when tray is full indicating it's time to empty.

Convenience Switches – Located on back in a panel of (3) switches.

Nightlight – Blue switch located on the far left of the panel. Allows you to choose to have the nightlight ON or OFF.

Hot & Cold Controls - Switch red control to OFF to stop heating. Switch green control to OFF to stop cooling.

Self-Sanitization Switch – Located on back by itself. Press IN, hold for 5 seconds and release to activate the cleaning cycle.

Activate Cold Switch

Notice: This unit will not dispense cold water until the switch is activated. To activate, push top side of the green switch in to start cooling water. If you do not want cold water leave switch in OFF position – bottom side pushed in.

Activate Hot Switch

Notice: This unit will dispense hot until the switch is activated. To activate, push top side of the red switch in to start heating water. If you do not want hot water leave switch in OFF position – bottom side pushed in.

Activate Nightlight

To activate, push top side of the blue switch in. The LED bulb behind center switch will light if you do not want a nightlight leave switch in OFF position – bottom side pushed in.

Register at Club Primo

While you wait for the water to get to the desired temperatures, please register your dispenser. This will be helpful should you need customer service assistance in the future. Go to www.PrimoWater.com and click on Club Primo.

OPERATION

This water dispenser has been tested and sanitized prior to packing and shipping. During transit dust and odors can accumulate in the tank and lines. Dispense and dispose at least one quart of water prior to drinking any water.

Dispensing Cold Water [37°F/°C / 3°/10°C]

Tank Capacity: 3.6L Flow Rate: 35ml per second / 126L per hour

After setup, it will take 1 hour to get water to maximum cold temperature. During this time you can be sure the power is on and the dispenser will run continuously. This is normal.

1. Position bottle, glass or pot beneath the spout. 2. Depress cold water control (light blue) downward to start water flow. 3. Release control once desired fill level is achieved.

Dispensing Hot Water [185°–210°F / 85°–95°C]

Tank Capacity: 1L Flow Rate: 35ml per second / 126L per hour

CAUTION: This unit dispenses water at temperatures that can cause severe burns. Direct contact with hot water. Keep children and pets away from unit while dispensing. Never allow children to dispense hot water without proper and direct supervision. Unplug unit to prevent unsupervised use by children.

After setup, hot water will be available in 15-20 minutes.

1. Position bottle, glass, pitcher or cooking pot below spout.
2. Depress control to dispense water. Release control once desired fill level is achieved.

MAINTENANCE

For best taste, performance and hygiene:

1. Clean your cabinet, controls, bottle probe and spout each time you change your water bottle. Use a soft cloth and a food grade sanitizer or bleach.
2. Empty and clean drip tray, grid and float as needed.
3. To minimize mineral deposits which can clog lines and impede flow and taste, use only high quality Primo bottled water.
4. Every 500-1000 cycles the self-sanitization feature will sanitize tanks and water lines. To activate, press in the self-sanitization switch, hold for 5 seconds and release. The green light will blink, indicating the cleaning process is underway. Ozone will be produced and injected into the water system. It will kill up to 99.9% of the bacteria and biofilms typically found in water dispensers. By the end of the cycle the ozone will convert to harmless oxygen and be emitted into the air.

NOTE: The cycle takes 90 minutes to complete. During this time do not dispense and drink the water. Doing so may result in an odd taste. For your convenience, we recommend that you do this during a period when the dispenser is not in use like overnight or when staff is away from the office. During the cycle you may smell a faint trace of ozone.

LIMITED WARRANTY

Primo Water Corporation, (“Vendor”) warrants to the original purchaser of this dispenser and to no other person, that if this dispenser is assembled and operated in accordance with the printed instructions accompanying it, then for a period of one year from the date of purchase, all parts in such dispenser shall be free from defects in material and workmanship. Vendor may require reasonable proof of your date of purchase from an authorized distributor. Therefore, you should retain your sales slip or invoice. The Limited Warranty shall be limited to repair or replacement of parts, which prove defective under normal use and service and which Vendor shall determine in its reasonable discretion upon examination to be defective. Before returning any parts, you should contact Vendor’s Customer Service Department using the contact information listed below. If Vendor, at its discretion, determines that the defect is not covered by the Limited Warranty, or if the product is not under warranty at the time of repair or replacement, it will be charged to the customer.

The Limited Warranty does not cover any failures or operating difficulties due to accident, abuse, misuse, alteration, misapplication, improper installation or improper maintenance or service by you or any third party, or failure to perform normal and routine maintenance on the dispenser, as set out in the User’s Manual. In addition, the Limited Warranty does not cover damages to the finish, such as scratches, dents, discoloration or rust after purchase.

The Limited Warranty is in lieu of all other express warranties. Vendor disclaims all warranties that are not expressly stated herein and all implied warranties, including without limitation the implied warranties of merchantability and fitness for a particular purpose. Further, Vendor shall have no liability whatsoever to purchaser or any third party for any special, indirect, punitive, incidental, or consequential damages, or limitations on how long a warranty lasts, so the above exclusion and limitations may not apply to you.
