First Steps Bottom-Loading Water Dispenser

CLEAN, MODERN, COMPLEMENTS YOUR LIFESTYLE

B290
First Steps Bottom-Loading Water Dispenser

#601272-C B290

FEATURES

CONVENIENCE SWITCHES – On/off switches for heating, warming, cooling and night light are located on the back of the dispenser.

EMPTY BOTTLE LIGHT – Blinks orange when the bottle is empty and needs to be replaced.

COLD WATER SELECTOR – Touch to select cold water, Snowflake illuminates blue when water is cooling.

DISPENSE CONTROL – Touch to dispense cold, hot, or warm water once you’ve selected a temperature. Release to stop dispensing.

WARM WATER SELECTOR – Touch to dispense warm water. Baby bottle illuminates yellow when water is warming and flashes yellow during the sanitization cycle of the warm water reservoir.

HOT WATER SELECTOR – Touch and hold to select hot water, Wavy lines illuminate red when water is heating.

SANITIZATION ICON – Flashes red during the sanitization cycle of the warm water reservoir, illuminates green when the cycle has been completed recently, and illuminates yellow when it’s nearing the time when we recommend you run another cycle.

PROBE ASSEMBLY – Probe pumps water from the bottle into the hot, warm and cold reservoirs.

PROBE HANGER – Rest probe assembly on the hanger (located inside the cabinet door) to keep it clean while replacing bottles.

Drip Tray – Removable and dishwasher-safe.

WATER BOTTLE – Sold separately. Uses 3- or 5-gallon bottles. Visit PrimoWater.com to find Primo® water at the store nearest you.

WHAT YOU’LL NEED TO HAVE HANDY

1. Primo® Water Dispenser
2. Drip tray (included)
3. 3- or 5-gallon bottle of Primo® water (sold separately)

QUICK START GUIDE

1. Place the dispenser on a level floor surface in the desired location in your home. (Note: Do NOT plug power cord into wall outlet until instructed.)

2. Position dispenser so the back is at least 4 inches from wall and there are at least 4 inches of clearance on both sides.

3. Slide drip tray into place.

5. Grab a bottle of Primo® water (sold separately) and fully remove the cap. Insert probe assembly into bottle. Press firmly to secure assembly over bottle opening. For 3-gallon bottles, squeeze the tabs on the top of the probe assembly to separate the probe cap from the collar and press the collar securely over the bottle opening.

6. Slide bottle inside the cabinet and close cabinet door. (Note: Water will not pump from bottle unless door is fully closed.)

7. Plug dispenser into a ground fault circuit interrupting (GFCI) outlet. You will hear the dispenser begin to pump water to fill the internal hot, warm and cold reservoirs.

8. Turn on desired function by flipping the switches on the back of the dispenser to the ON position.

9. Once the dispenser has stopped filling the internal reservoirs, dispense and dispose at least 1 quart (approximately 2 pint glasses) of water from the hot and cold controls.

An initial sanitization cycle of the warm water reservoir will begin automatically. The cycle will run for approximately 2 hours as the water inside the reservoir is boiled then cools to approximately 98.6 – 106 degrees.

10. Your water will be ready to dispense fully chilled in approximately 1 hour, piping-hot in approximately 12 minutes, or warm in approximately 2 hours once the initial sanitization cycle is complete.

11. Register your dispenser on our customer support page at PrimoWater.com to activate your warranty, which runs for 1 year from date of purchase.

Prime® Pre-Filled Exchange Water or Self-Service Refill Water from Prime® & Glacier® (sold separately)

Available at thousands of locations nationwide. Learn more at PrimoWater.com/locations.
First Steps Bottom-Loading Water Dispenser

OPERATING INSTRUCTIONS

DISPENSING COLD WATER
1. Water will take approximately 1 hour after initial setup to become cold. To prevent freezing, turn off all water using the cooling light will turn off. If the water has been fully chilled, once the water has been fully chilled,
2. Touch the snowflake icon to select cold water, then touch the dispenser controls to stop dispensing.
3. For non-stop dispensing, touch and hold snowflake icon for 10 seconds, Dispenser controls will flash. Touch dispenser control to start dispensing, touch again to stop. After 1 minute of continuous dispensing, water will automatically shut off to help prevent accidental spills.

DISPENSING WARM WATER
1. Warm water will be ready to dispense in approximately 2 hours once the initial sanitization cycle is complete. The sanitization light will change from flashing red to solid green and the yellow heating light will turn on when warm water is ready.

REPLACING THE BOTTLE
When your bottle is empty, the empty bottle light will flash. To replace the bottle, simply remove the empty bottle and replace with a full bottle of warm, or cool water when the bottle light is flashing. Replace the empty bottle as soon as possible to prevent freezing, warming and heating.

CLEANING & MAINTENANCE
For best taste, performance, and hygiene, clean your container, controls, bottle probe, and spouts regularly. Use a clean, soft cloth and food-grade sanitizer or bleach. Empty and clean drip tray and drain ring. Clean the cold reservoir regularly. We recommend running a sanitization cycle of the warm water reservoir. Due to the unique design of the warm water reservoir, it is not possible to manually fill this reservoir. To manually fill, touch and hold the snowflake icon for 10 seconds. The reservoir will drain automatically 15 hours after the last cycle. After 8 hours, the heating light will turn on and the water will be dispensed at normal temperature. The water will be dispensed at normal temperature.

CHILD LOCK OUT FUNCTION
Touch and hold the snowflake and warm/cool water icons for 3 seconds to lock the controls. Press the lock icon to unlock the controls. If the lock icon is pressed and held for 3 seconds, the lock icon will turn red, indicating that the lock is active and no water can be dispensed. If controls are touched, the icon will flash. To unlock, press and hold the snowflake and warm/cool water icons for 3 seconds. All icons will flash indicating unit is unlocked and the dispenser will resume normal operation.

LIMITED WARRANTY
Prime Water Corporation, 101N Cherry St. Suite 501, Winston-Salem, NC 27101
